

Services

Services in engineering, procurement, fabrication, construction, and maintenance

A worldwide execution platform assures clients that ACN can perform complex, logistically difficult projects anywhere in the world.

The company has a dynamic team of engineers, scientists, and technically qualified people with diverse backgrounds. This enables us to provide excellent multidisciplinary services.

ACN offers comprehensive EPC services to clients in a variety of industries, resulting in capital efficiency and project predictability.

Civil Construction

The highest level of quality, safety, efficiency, and innovation is guaranteed on your projects by our comprehensive suite of construction services

Mining and Mineral Processing

We provide high-efficiency, low-cost technological solutions for mining and metallurgy. We assist mining and metallurgical entrepreneurs in identifying opportunities and improving performance.

Energy

Renewable energy projects can change the world. Clean energy development helps businesses and governments construct a bright future

**PUBLIC-PRIVATE
PARTNERSHIPS**

Public-Private Partnership

Our public-private partnership (PPP) initiatives have different elements and one thing in common: they enhance the lives of numerous individuals. Even in times of limited public funding, urgently required actions can be executed with high standards of quality and financial viability.
