

ABOUT

About Us

ACN is a multinational company with a focus on engineering, technical services, and innovation. The company employs a highly-skilled group of engineers with years of expertise and technical training that are competent in the majority of engineering disciplines.

Innovation

ACN has created innovative solutions to real problems that our clients are facing. The engineering, procurement, and construction industries must be developed at a never-before-seen rate to keep up with the Fourth Industrial Revolution and current energy transition.

Career

We hire outstanding people and give them a digital-first workplace and work/life flexibility to succeed. Our people-first culture, on-the-job training, and industry-leading benefits set employees prepared for success. Come join us and you might be behind the work we do, the challenges we address, and the mark we make on the industry.

Our Story

At ACN, we believe that infrastructure gives opportunities for all, including the development of communities, the improvement of access, and the preservation of the environment.

We're committed to running our company ethically and improving, whether by creating social value or diversifying our leadership and workforce. We know our society faces urgent difficulties and needs significant, enduring action. Together with those who want to improve the world, we're creating a more sustainable and fair future. We listen to our clients and communities to enhance lives and means of subsistence and leave a lasting legacy for future generations. Our outside-the-box thinking keeps us ahead. Our society holds the notion that thoughts have no limits. Anyone in need can leverage our global experience.

We're trusted advisors in cities, transportation, buildings, water, new energy, and the environment. We're program and construction managers, planners, designers, engineers, and consultants. We're a team that works together to improve the world.

Let's Work
Together
